December 2024

*Wishing You a Merry Christmas
and a Prosperous New Year!*

As the festive season approaches, we'd like to take a moment to thank you for your continued support throughout the year. We hope your Christmas is filled with joy and the New Year brings success, happiness, and exciting opportunities for you and your business.

From all of us at EMiR Software, have a wonderful festive season and a Fantastic start to 2025!

New EMiR customers: a warm welcome to the EMiR Family!

Established in 1965 and based in Stoke on Trent, **E. Bennetts** have an excellent reputation of supplying quality Electric Motors, Drives, Industrial Gearboxes and Controls. They have a consultancy service that can advise on areas where to save energy and achieve cost savings. E. Bennett offer leading manufacturers' products such as WEG, Brook Crompton, Bauer & Wilo, to name a few, and have the ability to hold large amounts of stock in their warehouse.

Massey Coldbeck was established over 70 years ago in 1948 by Stanley Coldbeck and William Massey. They first opened their doors at a small premises on Hart Street in Liverpool City Centre and the first clients were a mixture of local commercial and industrial concerns. The Massey Coldbeck customer base quickly expanded during these first years, which enabled them to move to larger premises just outside the City Centre. Expansion has continued to combine workshops into one main site while retaining a Sales office in Kirkby, the result of which is the Engineering Head Office and Workshop located on Sherdley Business Park in St Helens, an 8,000ft² premises.

Massey Coldbeck provide 24-hour repair to Electric Motors & Rewinds, Pumps, Gearboxes Machining and Fabrication as well as inverters and Fans.

INVESTMENT AND DEVELOPMENT UPDATE

Live Finance

Introducing EMiR Live Finance

Financial Management with Real-Time Capabilities

Over the last 12 months we have held focus groups with some of our customers to discuss the functionality of the EMiR Finance module. These meetings followed some investigation into key accounting products available on the market. We want to be certain that EMiR Finance falls in line with accounting best practices. To that end we created a technical spec and set about developing the EMiR Finance module, which has resulted in "Live Finance", which is now available to EMiR customers.

Key Features – of Live Finance and Flexible Reporting:

- **Immediate Posting of Operational transactions as Financial transactions in EMiR**
 - Totally eliminating the month-end process to post to the Nominal Ledger
 - Automatically adjusting BS Stock, WIP and GRNI NL Accounts
 - Removes the need for monthly BS Adjustment Journals
 - Posting Job Costs to the P&L only when the job is closed
- **Dynamic Posting Periods**
 - Post transactions into any period and any year
 - No requirement to roll a period/year and have a 'hard close'
 - Ability to close ledgers and/or periods if you choose to
 - Can post into a Prior Year whilst posting into the Current Year
- **Customisable Chart of Accounts**
 - Tailor your chart of accounts to your specific needs
 - Now with up to 9999, four-digit nominal ledger codes
 - No more restrictions on where codes are reported in the accounts
 - Can set different reporting areas for debits and credits against the same code
- **Live Reporting:**
 - Real-time reports based on transaction dates, giving on-demand insights
 - Easily export data to Excel for further analysis
 - Drillable NL Reports that allow you to explore data at a granular level
- **Greater Transactional Visibility**
 - Detailed narrative on each Live Finance transaction
 - Clear audit trail of items moving in and out of BS codes

If you are interested in implementing Live Finance within your business, please email annette@solutionsinit.com

EMiR-Cloud Migration Project

We are pleased to confirm that the cloud migration project was successfully completed over the weekend of the 23rd and 24th November.

This is part of our continual mission to improve and enhance our customer-facing infrastructure. We have been working with Node4 on a project to investigate, setup and test migrating the EMiR cloud services to an upgraded data centre.

Some of the benefits for the new data centre

Increased self-service functionality which would allow the EMiR support staff to execute changes rather than submitting a change request to Node4, meaning faster resolution times.

Expected performance increase on a server level, due to newer hardware and enhanced backbone in the new data centre.

More 24/7 support staff maintaining the new data centre, thus providing better out-of-hours responses to system outage alerts.

A significant number of EMiR customers now use the EMiR-Cloud, which provides up-to-date virus and malware protection to ensure your business against cyber-attacks. With EMiR-Cloud there are no upfront hardware or software costs, you simply pay for what you use when you use it. And, as a managed service from EMiR, we take all of the hassle away and provide full support and management of your server environment.

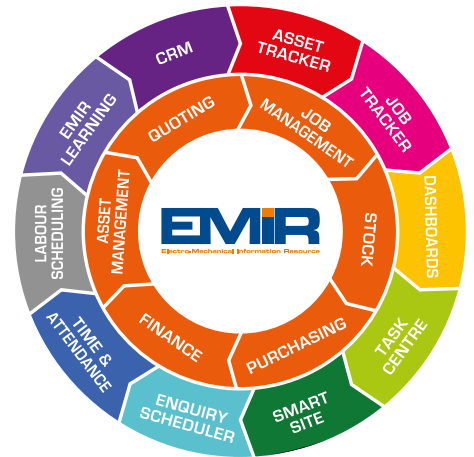

Please get in touch if you would like to talk to us about an EMiR-Cloud solution.

EMiR-Cloud

“Your entire working computer environment delivered to your desktop, wherever and whenever you need it”

This year EMiR provided a "Business Process Clinic" for the conference attendees. With over 30 years working with electro-mechanical businesses, we have helped customers optimise their operations and improve efficiencies. We welcomed many prospects and existing EMiR customers, offering our support and guidance to both.

If you would like to book a business process discussion, please do get in touch.

AEMT Awards 2024

It was great to see so many of our customers and AEMT friends at the awards evening, which was attended by over 200 guests.

We were joined by EMiR customers Kyle Sanders & Tom Ingram from DR Clark, George Knowlton from Knowlton and Newman, Matt & Esther Brown from Earthmet and Andy Patten and James Schooler from ADC Electrical. Although we didn't win on the night, we were **Finalists for Product of the Year** for our **Smart Site Mobile App**. We did, however, have a

winner on our table – congratulations go to James Schooler for achieving Rising Star of the Year, which was one of the largest categories entered this year.

We also continue to sponsor the well contended "Project of the Year" category, this year won by Innomotics. "Service Centre of the Year" is always rich with a great caliber of entries. This year the Finalists were Brothers-EMR, FenFlow, Kirkby Lindsey, Hidrostal, IPS, MKE Engineering and Westin, all powered by EMiR. Winner on the night was Hidrostal.

Huge congratulations to them with a double win for a special recognition award for their work with Equality, Diversity and Inclusion.

For a full list of Awards and finalists please scan the QR code or take a look at the AEMT Web Site: <https://www.theaemt.com/resource/winners-announced-at-2024-aemt-awards.html>
