Take the 7 Steps to
Site Service Success

5. FILL IN SAFETY AND SERVICE CHECKLISTS

The screenshots show the EMiR app interface for job 51052. The first screenshot shows the 'Safety Checklist' with fields for 'Does confined space procedure apply?' and 'Lifting equipment required?'. The second screenshot shows the 'Service Checklist' with sections for 'FUNCTION TEST MACHINE', 'CORRECT SIGNS AND LABELS', 'SAFETY INTERLOCKS', and 'EMERGENCY STOPS'. The third screenshot shows the 'Sign Off' screen where the user confirms completion and signs off.

The main job screen for job 51052 shows a list of tasks: 'Record Materials', 'Record Mileage/Expenses', 'Record Activities', 'Record Job Notes', 'Safety Checklist', 'Service Checklist', 'Pictures', and 'Obtain Customer Signature'. Each task has a right arrow. The 'Safety Checklist', 'Service Checklist', and 'Pictures' tasks are highlighted with orange boxes and numbered 5, 6, and 7 respectively. At the bottom is a large orange 'COMPLETE JOB' button.

6. REVIEW AND TAKE RELEVANT PHOTOGRAPHS OF THE WORK

SMART Site users benefit from:

- 1 Both a structured and paperless approach to service delivery – no more printed job sheets!
- 2 A simple to use system that works intuitively on existing Apple iOS and Android Smartphone architecture. No special hardware or user training required!
- 3 The progress of jobs and all of the detail collected can be synchronised with the back office EMiR system as often as required, so you will always know what the engineer has done and, most importantly, be able to invoice soon after the work is completed!

The smartphone mockup displays the EMiR 25 logo and a dashboard with various modules. The modules are arranged in a grid and include: Winding Details Database, E-Commerce, Web-CALLS, Financial Interface, Stock, Purchasing, Quoting, Finance, Asset Management, Workshop Routing, Time & Attendance, Web Job Tracker, Smart Site, Labour Scheduling, CRM, and Task Centre. The dashboard is labeled 'Basic'.

Smart Site is just one of 19 feature-rich Modules and Extensions that have been designed for the electro-mechanical industry's favourite business software application, EMiR.

EMiR delivers operational accuracy and certainty which reduces costs, saves time, increases efficiency and improves customer service.

Follow the '7 Steps of Site Service Success'!
