AEMT AWARDS

The AEMT Awards are fast approaching, and we are excited to celebrate the achievements of companies and individuals who have made a real impact this year. It's always a brilliant evening that showcases the best of the electro mechanical world, and we look forward to supporting the nominees and cheering on our community.

This year, we'll be joined at our table by representatives from DR Clark, Hayley Group, and Ridgeway Machines, and we're looking forward to what promises to be another fantastic evening. We're also proud to be involved in this year's awards, with Kirstie joining the judging panel, while Annette Boulter has been shortlisted in the **Contribution to Skills and Training** category and EMiR Software has been shortlisted for **Diversity in Engineering**. As proud sponsors of the Project of the Year category, we'd also like to congratulate this year's finalists and recognise the innovation, expertise and dedication demonstrated across the industry:

- **Innomotics**
- **Mawdsleys BER Ltd.**
- **MKE Engineering Group**
- **Sulzer**
- **WEG**
- **Menzel Elektromotoren**

We wish all finalists the very best of luck and can't wait to celebrate with the wider AEMT community.

AEMT CONFERENCE

This year's AEMT Conference proved once again why it has become one of the most important events in the electro-mechanical calendar.

Held beneath the iconic Concorde, the day was filled with customer conversations, product demonstrations, industry discussions and opportunities to connect with both familiar faces and new contacts. The atmosphere throughout the event reflected the collaborative spirit that continues to drive our sector forward.

A highlight for us was hosting the Women in Engineering: Power Together session. The discussion was honest, engaging and full of fresh ideas, made even more special by the involvement of the Unifrog students, who brought tremendous energy and perspective to the conversation.

Continued overleaf >

Seeing young people connecting with our industry and exploring future career opportunities was incredibly encouraging and highlighted the importance of creating opportunities for the next generation of engineering talent.

Congratulations must also go to Scott Haslam and the entire AEMT team. What began as a vision to create a more collaborative and engaging industry event has grown into something truly special, bringing together professionals from across the electro-mechanical sector for a day of learning, networking and industry collaboration.

Thank you to everyone who visited the EMiR stand. The conversations, feedback and enthusiasm for what we're building made the conference a real success and one we look forward to supporting again in the future.

This year, Annette Boulter presented an update on the continued development of EMiR Software and the company's vision for supporting the future of repair and service businesses. Delegates learned about recent enhancements across the EMiR platform, as well as the introduction of **EMiR Repair Shop**, a modern cloud-based SaaS solution designed specifically for repair and service workshops seeking a simpler approach to job management.

The session highlighted EMiR's ongoing investment in new technologies, its commitment to evolving alongside industry requirements, and its ambition to support the next generation of repair businesses. Attendees gained valuable insight into how EMiR is expanding beyond traditional ERP systems to deliver flexible, future-ready solutions that help businesses improve efficiency, streamline operations, and embrace digital transformation.

This well-attended spotlight session reinforced EMiR Software's position as a trusted technology partner within the electro-mechanical repair industry, whilst offering a glimpse into the exciting developments ahead.

AEMT WOMEN IN ENGINEERING POWER TOGETHER

We're proud to continue supporting Women in Engineering and highlighting the incredible talent shaping our industry's future. The AEMT Conference featured a dedicated Women in Engineering Power Hour for the second year. The session created a supportive space for open discussion, practical advice, and industry insights, highlighting the importance of visibility and community. It was a brilliant reminder of the growing strength and influence of women in engineering, and a moment that left attendees feeling inspired and connected.

We were excited to host this Women in Engineering Power Together session and it turned out brilliantly. The discussion was honest, engaging and full of ideas, it was made even more special by the involvement of the Unifrog students, who brought great energy and perspective to the conversation. Seeing young people connecting with our industry and exploring future career opportunities was incredibly encouraging.

AEMT Golf Day – A Great Day on (and off) the Course!

The annual AEMT Golf Day, proudly sponsored by EMiR Software, was another fantastic success.

Another brilliant day on the course was enjoyed at the annual AEMT Golf Day, proudly sponsored by EMiR Software. The event brought together members of the industry for a great combination of golf, networking, and catching up with colleagues in a relaxed setting.

Looking ahead, next year's AEMT Golf Day will take place on **Thursday 16th September** at **The Warwickshire**. Team bookings are now being taken, so if you'd like to secure your place and join us for another fantastic day on the course, please email us for further details.

We look forward to seeing you next year!

Meet our New Customers

We're delighted to welcome **HVAC Spares Limited** as a new EMiR Software customer. Specialising in the supply of genuine and replacement parts for current, older and obsolete HVAC equipment, the company has built a strong reputation for helping customers keep critical systems running efficiently. With extensive product knowledge and a commitment to sourcing hard-to-find components, HVAC Spares continues to provide a reliable and responsive service to customers across the industry.

SCAN ME

We're also pleased to welcome **Middleton Engineering** to the EMiR Software community. A specialist provider of innovative waste management solutions, Middleton Engineering is known for its customer-focused approach and reputation for solving industry challenges. With a team of dedicated specialist engineers and a strong commitment to service, the company works closely with customers to deliver practical, effective solutions that meet their operational needs.
